

Amendments to the Specification

Please amend the Title as follows:

-- TEST DEVICE FOR ANALYSING ANALYZING A BIOLOGICAL
SAMPLE LIQUID --.

Please amend the Abstract as follows:

-- The invention concerns a test device for analysing analyzing especially a biological sample liquid comprising a composite body (40) consisting of a plurality of layers of flat materials (12, 18, 30) and a sample channel (20) located in the composite body (40) for transporting the sample liquid from an application site (22) to a measuring site (24). According to the invention it is proposed that the composite body (40) has a plurality of transport layers (18) arranged in a stack-like manner between support layers (12) for holding in each case a sample channel (20). --.
